# BIKE

Cycling has become a global trend in recent years – with sales on the rise particularly in urban settings where it has become a key means of transport for people who enjoy a less car-centered lifestyle. Today, the focus of the trend is on quality bicycles and smart bicycle accessories. This is why the centerpiece of our new collection is the ORTLIEB Urban Line: a complete series of high quality bags whose appealing colors fit perfectly in your home, office and recreational settings. Like all ORTLIEB products, they are waterproof. This is because those who value sustainable means of transport independent of automobiles need to be equally

independent of the weather. Sustainability also plays an important role in our production processes. We manufacture all of our waterproof products at our production facility in Heilsbronn, Germany. High product quality, durability and our own repair service are just as integral to our philosophy as our commitment to the sustainable use of natural resources and environmental protection. This is because the preservation of what moves us will always depend on our ability to join forces!

# WATERPROOF

What's behind the legendary "Made in Germany" waterproof quality? We work exclusively with durable materials, advanced bonding methods and proven types of closures. For instance, we use high frequency welding to meet the highest of waterproofing specifications. This helps to distinguish ORTLIEB products as true outdoor champions compared to other merely sewn or glued products.

## ADVANCED BONDING METHODS

The coated fabric used by ORTLIEB – including all welded seams – continues to resist leaking when exposed to a 100,000 mm column of water! This extreme degree of waterproofing is achieved using a process known as high frequency welding (HFW). Instead of applying heat from the outside, HFW involves the application of high frequency voltage to the objects that need to be welded. The voltage causes the molecules within the various materials to vibrate and, essentially, to generate heat. Softened from within by the heat, the materials are then bonded under high pressure, leaving the welded seam at least as strong as the surrounding material.

## PROVEN CLOSURES

The third important factor for high waterproof and dustproof performance is the type of closures used. All of the closures used in ORTLIEB products are subjected to extensive environmental simulation testing. One common test parameter

is referred to as ingress protection (IP). Originally used in the field of electrical engineering, IP ratings have become increasingly common in the outdoor recreation sector.

### 1. Flap closure:

Flap closures protect against dust and spray water from angles of up to 60° to 90°. Also available with a snow shield or an additional roll closure, the flap accomplishes its mission on every outing. Snap buckles and hooks are used to secure the flap's closure. Products in the City Line are typically outfitted with magnetic fasteners to facilitate handling.

### 4. Waterproof zipper:

TIZIP zippers reliably prevent water and dust from entering your ORTLIEB bags. The inside of the bags will remain dry when submerged under 1 meter of water for a period of 30 minutes. The waterproof and dustproof design leads to a slightly greater degree of friction when opening and closing the bag.

### 2. Roll closure:

The roll closure is a simple, effective and highly versatile means of keeping the inside separate from the outside. It is completely dustproof and protects the contents of ORTLIEB bags against spray water from all directions. The roll closure gains its stability and waterproof quality from the thin plastic stiffener bars sewn into the upper end of the material. The height or volume of packed bags can also be reduced by rolling up the material further. Those interested in maximum compactness are encouraged to select the model with the integrated valve.

### 5. Clip Closure:

A clip closure system is used for the ORTLIEB Smartphone Case. The two halves of the plastic case are outfitted with a sealing contour. These halves are pressed together and held in place with two clips. The system guarantees complete dust protection and reliable waterproof performance for a period of 30 minutes at a submerged depth of one meter.

### 3. Quick-Seal-Closure:

The Quick Seal Closure allows you to quickly open and close your ORTLIEB bag by simply moving a slider along two flexible plastic profiles. The closure reliably protects the inside of the bag against dust and spray water from all directions. Ideal for daily use!

**Advice:** The Quick Seal closure may not work properly at temperatures of less than -5°C/23°F.

## DURABLE MATERIALS

ORTLIEB's outstanding waterproof quality is based on selected materials that are developed for specific applications. Such materials include polyester, nylon and Cordura fabrics that are coated on one or both sides. If a fabric is coated on one side only, the opposite side will retain its textile look. If both sides of a fabric are coated, they will both have the familiar tarpaulin look. ORTLIEB's thermoplastic coatings meet extremely high waterproofing specifications, and are therefore far superior to most commercially available tent or backpack coatings.

### Waterproof Ratings: What's Behind the Numbers?

A standard procedure (ISO 811) is commonly used to determine the degree to which a material or fabric is waterproof. Sometimes referred to as the hydrostatic head test, the procedure determines the pressure – measured by the height in millimeters of a column of water held in a tube above the fabric – at which the fabric begins to leak. A piece of fabric that shows no signs of leaking when placed under a 4,000 mm column of water is essentially capable of withstanding the hydrostatic pressure objects are exposed to at a submerged depth of four meters.

# BACK-ROLLER URBAN

The multifunctional Urban Back-Roller is an ideal single bag for bike riders who are looking for a spacious, waterproof bike bag to accompany them on their way to work or school. Made of a special blend of cotton and Cordura fabrics, the bag has a textile appearance that is a perfect match for both casual and business attire. Thanks to a polyurethane coating on the inside, it is nonetheless absolutely waterproof. The practical QL2.1 mounting system enables you to quickly and conveniently attach the bag to your bike rack. The bag's internal pocket, consisting of a main compartment and a zippered mesh compartment helps you to keep things orderly and immediately accessible. A detachable shoulder strap allows you to comfortably carry the Urban Back-Roller once you set off on foot.

#### Optional accessories:

#### Further features:

3M Scotchlite reflectors

# REPORTER-BAG

Newly assigned to cover the story – and already making headlines. Made of a PVC-free blend of cotton and Cordura fabric, the Reporter-Bag is an outstanding space manager. The locking-hook flap gives you quick access to the main compartment with its waterproof zipper. A new shoulder strap concept ensures comfortable carrying and offers additional safety while you ride. Inside you will find a number of interesting details, including a laptop compartment and various inside pockets.

## OVERVIEW ORTLIEB QL MOUNTING SYSTEMS:

### QL3 SYSTEM

The QL3 system is especially developed for office and city bags and its secret lies in the fact that the main mounting components stay on the rack. This results in a clear rear side that is free of protruding hooks, and significantly improves the bag's carrying comfort when off the bike.

**The QL3 system has all the known advantages of the previous ORTLIEB QL systems:**

- Comfortable single-handed operation
- Automatic closing and opening of the hooks by lifting the pannier handle
- Fixing rail can be mounted on left or right side, and optionally on horizontal or vertical bars of rack
- Sufficient legroom due to variable height and angle
- Lower hook rotatable in 360° (24 steps, each 15°) for individual adjustment to racks with a tube diameter up to 10 mm, or 11-14 mm with optional mounting set (art.no. E190)
- Horizontal rack top remains free for baskets, trunkbags etc.
- Additional mounting sets available for attaching bags to other bikes (art.no. E175)
- Bags with QL1, QL2 or QL2.1 system can also be fixed to the QL3 mounting rail
- Direct mounting without QL3 mounting rail possible to Tubus rack „Minimal QL3“ and Racktime rack „Match-it QL3“

Used on: Single-Bag QL3, Office-Bag QL3, Downtown QL3, Vario QL3, City-Biker QL3, Commuter-Bag QL3

### QL2.1 SYSTEM

This mounting system QL2.1 for bike panniers is the further development of ORTLIEB's milestone setting QL1 system. All hooks are adjustable to the rack without requiring any tools. Therefore, the panniers can be easily switched from one bike to another. The QL2.1 system may be upgraded with the anti-theft device (not possible in QL1).

**This innovative system has the following features that distinguish it from others:**

- Comfortable single-handed operation
- 16 mm QL hooks with inserts which have an „anti-scratch“ function for 8, 10 and 12 mm. In QL2.1, the reductions inserts are attached from the sides and secured against loss.
- 20 mm QL hooks are optionally available for racks with larger diameters (17-20 mm) as often used on E-bikes.
- The upper mounting rail consists of one piece for high stability. With models Office-Bag and Downtown it can be adjusted to the left or right side of the bike rack.
- The special assembly system allows the use of extremely flat nuts on the inner side thus featuring a level surface and avoiding damage to whatever you bring along.
- The lower hook rail is made of a two-component synthetic combination with „anti-scratch“ function. This reduces abrasions on the carrier and prevents damage to the rack tubing. The lower hook is rotatable in 15° steps and adjustable in height.
- All hooks are adjustable to the rack without requiring any tools and can be easily exchanged.
- Optional upgrade with anti-theft device into the upper rail.

Used on: almost all panniers from 2015

### QL1 SYSTEM

The QL1 System was ORTLIEB's first mounting system for bike panniers which allowed a single-handed mounting on and removal of panniers from the bike rack. The automatically closing hooks replaced the complicated attachments with straps and buckles which were slow and unreliable. Thousands of the indestructible mounting QL1 system have now been used for decades on ORTLIEB bike panniers and are still in use.

**The QL1 system features:**

- Optimal fit on all racks with a tube diameter up to 16m (inserts for 8/11 mm inclusive)
- Comfortable single-handed operation
- Automatic closing and opening of the hooks by lifting the pannier handle
- Large adjustment range of QL1 hook on hook rail
- Large adjustment range (horizontal and vertical) in 15° steps of lower hook on semi-elliptical rail

Used on: Back-Roller City, Front-Roller City

## FOR GREATER VISIBILITY IN STREET TRAFFIC!

High visibility is so important to us at ORTLIEB because it is a matter of safety. Both the waterproof, polyurethane-coated Cordura fabric in neon yellow and the black fabric parts of this bag are densely interwoven with high-luminosity reflective yarn. This composition turns the entire bag into an eminently visible reflector when it is picked up in the headlights of passing cars.

## CONTRAST PROGRAM WITH A CLEAR MESSAGE

The black-and-white design helps to attract a higher level of attention, which is good because the waterproof, polyurethane-coated canvas material is completely PVC-free. There is naturally more behind the ORTLIEB logo than a fashion statement and a demonstration of how good-looking sustainable designs can be.

## WORLD TRAVELER

Ready for a tour across Europe, Asia or even around the world? Embark on a challenging and breathtaking adventure with your bike loaded to a maximum. With every ounce making a difference, it's a good thing that ORTLIEB bags are so lightweight. And even when facing a hard driving rain on a long stretch of road, you'll have no reason to get discouraged because not a drop will make it into your bag's interior. You'll simply keep going onwards towards the sun.

## TRAVEL-SET

### Specifications:

volume	72 L / 4394 cu.in.
feature	QL2.1 / TIZIP
weight	4970 g / 69.5 oz.
fabric	PS42R / PS33

### The Travel-Set comes with:

slate-black  
with SNAP-IT adapter  
72L | art.no. F2046

This waterproof luggage system allows experienced cyclists to carry all the necessities for extended touring or weekend family trips. Plenty of room combined with excellent comfort. Clothes can be stowed away crease free in the large suitcase. Four inner pockets, two zippered, two internal compression straps and an outer mesh pocket provide plenty of possibilities to store your gear. All other equipment is packed in the rear panniers Bike-Tourer. Valuables and money are to hand in the handlebar bag Ultimate6 Plus. The included anti-theft device means that the panniers may be left on the bike, deterred from unauthorised removal. Optional accessories include the Outer-Pocket size S, the Bottle Cage and Mesh Pocket. The Travel-Set is available in two versions: suitcase Travel-Biker is either supplied with ORTLIEB rack adapter or with Snap-it adapter for Racktime system carriers (lock available as accessory).

## BIKE-TOURER

## TRAVEL-BIKER

Passionate cyclists who want to escape the daily routine will pack their Bike-Tourer. The bag is specifically designed to be used as a rear pannier, providing more than enough room for a serious tour. An internal division and added front pouch help organize your gear. The convenient flap is quick and easy to use one handed. Four base feet protect the pannier base. Padded adjustable shoulder straps provide comfort and can be easily detached. The Bike-Tourer attaches to any standard bike rack up to 16m (inserts for 8, 10 and 12 mm included) with the QL2.1 attachment system. For extra room, the Bike-Tourer can be perfectly combined with the ORTLIEB Travel-Biker or Trunk-Bag.

### Further features:

Those who wish to be prepared for any situation on the road make the right choice with the Travel-Biker. The handy suitcase is designed for carrying clothes; stylish clothing will arrive dry with minimum creases. Four internal pockets, two of which zippered, and two compression straps help keeping things in place. An outer mesh pocket and elastics on the lid offer additional room for extra gear. The waterproof Travel-Biker is ideal for use on touring or trekking bikes. With a "click" it is fixed fast and easily onto the rack adapter: simply slide on and click in. The Travel-Biker can be combined with all ORTLIEB bike panniers. Maximum capacity: 10 kg / 350 oz. (check capacity of rack). Travel-Biker is available with ORTLIEB rack adapter or with Snapit adapter for Racktime system carriers (lock available as accessory).

## ULTIMATIVE TOURING FUN

Ultimate handlebar bags are typical ORTLIEB originals: handy, light weight bags that take lots of gear. Well thought out design, stable form and rigid lid keep them in shape. The handlebar bags can be locked to the adapter, which is compatible with KLICKfix by Rixen&Kaul.

## ULTIMATE6 PRO E

IP 54 PVC free

Make low battery power a thing of the past! The Ultimate 6 Pro E allows you to recharge while riding your bike. This practical touring handlebar bag offers the right platform, allowing you to operate your mobile devices (e.g. for navigation) with the power you generate via your hub dynamo. All you need is an appropriate converter that can be purchased separately. Thanks to the contacts integrated in the handlebar bag's mounting device, a power connection is established automatically as soon as you attach the bag to the handlebar.

### Further features:

SPORTS MADE IN GERMANY

The minimalist design and weight make this a pack you can carry all day long. Though the Cor13 has no external frame, it is very comfortable. The padded back with ventilation channels provides efficient air circulation. The anatomically contoured shoulder straps and chest strap are individually adjustable, and keep the pack close to your body. The waterproof nylon fabric is extremely abrasion resistant and gives the pack its low weight (only 700 g/24.5 oz.). Helmets may be stowed under the adjustable and removable front flap with large reflective print. The main compartment houses a sewn-in organizer for the inclusion of an optional hydration system. It goes without saying that the Cor13 is well suited for hiking and ski tours. Snowboarders can fix their board under the front flap, and will enjoy the Cor's perfect fit during freeriding.

## SADDLE-BAG

ORTLIEB's classic seat bag is available in three sizes, depending on the type of tour. The small version with 0.8 L/49 cu.in. is an excellent fit for road applications, while the medium is perfect for mountain bikers. Size L is a true alternative to carrying a backpack, providing room for equipment, snacks, extra shells and tools for long day tours. It tucks in nicely under the saddle, and often functions as protector on bikes without fenders. The additional fixation with Velcro, around

the seat post provides firm and vibration-free mounting. The waterproof roll closure features buckles and D-rings for locking the bag. The mounting set is also available as accessory.

### For Selle Royal Saddles:

The waterproof and super lightweight Micro ICS saddlebag was designed for high performance outings on your racing bike or mountain bike. The Micro ICS is outfitted for use with the Selle Royal Integrated Clip System (ICS). This means that you can quickly and conveniently attach it to all saddles that are also outfitted for the ICS system. With a 0.6-liter payload, the Micro ICS offers plenty of space for a replacement tube, a repair kit, energy bars and a rain jacket. The roll closure, with its rubber drawstrings, allows you to keep the bag especially compact and close to the saddle. A high luminosity reflector enhances your safety at dusk and after nightfall.

### Advice:

Please refer to [www.selleroyal.com](http://www.selleroyal.com) for more information about saddles with the ICS system | The Micro ICS's tilt is adjustable.

# BACK-ROLLER DESIGN

It brings more colour into your life, daily shopping and work trips. The fun starts with choosing between „Parts“, „Flow“ and „Chain“ designs, each available in two different colour combinations. The trendy rear panniers are made of PD620 and PS490 and feature a waterproof roll closure and QL2.1 mounting system. Once taken off the rack, the padded strap allows a comfortable shoulder carrying. Strong 3M Scotchlite reflectors ensure safety in the dark and in bad weather conditions. With the ORTLIEB Travel-Biker or Trunk-Bag they also form a functional combination on the rear bike rack.

## PANNIER CARRYING SYSTEM

Flexibility by bike and on foot! The Pannier Carrying System quickly converts your bike pannier into a backpack. The thermally moulded foam back pad along with padded and adjustable shoulder straps and chest strap guarantee a comfortable carrying with excellent ventilation. Low weight, the carrying system can be easily fixed onto the pannier when not in use. It's suitable for Front- and Back-Rollers, Bike-Packer, Sport-Packer, Bike-Tourer, Velo-Shopper and Bike-Shopper.

To fix the pannier onto the carrying system, its top loops are hooked into the pannier's QL hooks, and the buckles are threaded into the base edge protectors.

Can be combined with all bike panniers featuring edge protectors (QL1, QL2 and QL2.1).

Messenger bags can't be large enough – at least according to professional bike couriers. No problem for ORTLIEB! In cooperation with bike messengers in Nuremberg and Berlin we created a 60 liter Messenger Bag XL – the king-size version of courier bags. The spacious backpack easily takes an A2 folder plus two boxes of photocopier paper. Mailing tubes can be fixed with straps to the sides. A zippered front pocket (not waterproof) offers room for miscellaneous accessories. The large flap with strong Velcro provides quick access. Bulky goods can be securely fixed to the lid by using the additional buckles.

The adjustable ergonomic shoulder straps and the padded carrying system with ventilation channels ensure top comfort even when fully loaded. A stable base construction allows safe placement of deliveries at their destination. The sturdy fabric combination of polyester and Cordura in yellow-black as well as large reflectors ensure safety in traffic.

### Further features:

## PROTECTING THE ENVIRONMENT

As one of the very first outdoor equipment companies, we remain committed to a holistic, ecological world view. It is especially important to us, for instance, to take a considerate and respectful approach to nature. This is why we are continuously on the uptake for ways of minimizing our carbon footprint. Most of the materials we use are manufactured in Germany. This makes for shorter transport distances, speedier delivery times and reduced carbon emissions. Our production processes are also geared to resource conservation and the use of renewable sources of energy, with our own photovoltaic installation covering one-third of our overall energy needs. Moreover, ORTLIEB documents – such as the catalogue you’re now holding in your hand – are printed and sent on FSC-certified paper in an environmentally sustainable and climate neutral manner.

## ENVIRONMENTAL AND SOCIAL RESPONSIBILITY

No matter what their language, people around the world have come to associate the name ORTLIEB with high quality outdoor equipment that is waterproof and made to last. Although our outdoor bags are in action throughout the world, we remain committed to our local community when it comes to product development and production. “Made in Germany” is a part

of our brand promise. It stands for high quality, regional jobs, environmentally sustainable production and a human resources culture of mutual respect. At ORTLIEB, sustainability is a commitment to excellent craftsmanship and consistent environmental and social responsibility.

### SECURING QUALITY

Waterproof ORTLIEB bags are developed and manufactured exclusively at the company’s production facility in Heilsbronn, Germany. This arrangement allows us to effectively maintain and continuously improve our high standards of quality so as to secure our capacity to make long-lasting products. The fact that our service unit has received products that were in need of repair – for the first time – after 20 years of use is a source

of pride for us. Our aim is to effectively conserve resources while at the same time ensuring your long-term satisfaction with ORTLIEB products. This comes with a watertight promise: we offer a 5-year guarantee on all of our materials and workmanship, and we guarantee that replacement parts will remain available for all of our products for a period of at least 10 years after any given article has been phased out.

### APPRECIATING PEOPLE

“Made in Germany” is more than a seal of quality for us. At our headquarters in Heilsbronn, Germany, we are committed to securing jobs and strengthening the regional economy for the long term. We are proud of a human resources culture that is characterized by honesty, mutual respect and flat hierarchies. We encourage self-reliant and responsible approaches to job performance. This commitment gives rise to long-term bonds and the best ideas. It is essentially the secret to ORTLIEB’s success. Long-standing employees offer our enterprise a wealth of knowledge and experience. We all reach the summit when this valuable knowledge and experience flow into the development of your outdoor equipment.

### CORPORATE SOCIAL RESPONSIBILITY

We are committed to making a contribution to both the economic and the social vitality of our region. In the interest of securing the region’s social vitality, we make financial and material donations to non-profit organizations, such as the Heilsbronn Citizens Foundation, that work to improve the lives of underprivileged and vulnerable individuals. However, in fulfilling our corporate social responsibility, we at ORTLIEB also include a healthy measure of pragmatism. For instance, as one of the pioneers of the waterproof bike bag, we actively promote bicycle-centered initiatives. We also support initiatives, associations and organizations that encourage people to make a contribution to climate protection. We also join forces with other enterprises in the outdoor industry to help promote environmental protection. One example of this is ORTLIEB’s membership in the European Outdoor Conservation Association (EOCA), which raises funds for conservation projects throughout the world.

The primary aim of the climate protection project in Brazil is to reintroduce more than 50 native tree species to abandoned and overused pastureland. This reforestation effectively restores important habitats for plants and animals, and thereby serves to protect the natural ecosystem in one of the most species-rich regions of the world. However, the project has also distinguished itself in terms of its social impact. New jobs have been created for the native population, and people's awareness of the necessity of climate protection has been raised.

# OUTDOOR

Wanderlust is something that adventurers, world travelers and outdoor sports enthusiasts have in common. A desire to break out of comfort zones, leave daily routines behind and experience nature and faraway places. All such undertakings require reliable equipment that is lightweight, durable, dustproof and waterproof. Winner of the OutDoor INDUSTRY AWARD 2014, our latest development in the outdoor sector, the Duffie RS travel and expedition bag, meets these demands while also offering a high degree of travel comfort thanks its unique roller system. This extremely

durable bag also distinguishes itself in terms of an outstanding payload-to-weight ratio, which makes it ideal for long-distance journeys. Like all of our waterproof products, the Duffie RS is manufactured at our production facility in Heilsbronn, Germany. This allows us to guarantee high quality and maintain our commitment to ensuring the reliability of ORTLIEB equipment no matter what the weather and no matter what your mission.

# ELEVATION PRO

IP 64 PVC free

Light weight, clean design, sturdy fabric: ORTLIEB's newest model, the innovative alpine and mountaineering backpack Elevation Pro, reliable for rock and ice. It is entirely designed for functionality under most extreme conditions. The proven roll closure underneath the flap and the external flap compartment guarantee a high IP rating with regards to being waterproof and dustproof. The external waterproof zipper allows easy access to gear stored inside the lid. There are numerous fixing options for equipment: daisychains, waterproof flap compartment, preparation for hydration system, helmet fixing, base loops for crampons, gear loops for trekking poles and ice axe, compression straps suitable for transporting skis or rope.

The contact back system with ventilation channels and anatomically shaped shoulder straps ensure high carrying comfort. The shoulder straps are adjustable and the adjustable chest strap ensures perfect individual fit. Waist straps with gear loops are removable and feature two zippered pockets. The Elevation Pro is available in two capacities: 32 and 42 litres.

#### Further features:

Abrasion and tear-resistant nylon fabric PS42R | Adjustable elasticated sternum strap with emergency whistle | Inner pocket for optional hydration system with two sleeves, one zippered

## X-PLOERER

IP 64

This stuff sack is the perfect choice for canyoning, climbing or caving. It is also a favourite luggage piece on motorcycles. The combination of rucksack and dry bag is by far lighter than a conventional backpack with carrying system. It is available in two sizes, and when empty, it can be rolled into a flat little package.

Proven on tracks and trails around the world, PS490 dry bags are versatile and durable. Made with one of ORTLIEB's strongest heavy-duty fabrics, they can withstand just about anything. They feature a roll-down closure with stiffener bar, a tough base that makes packing easier than ever, and D-rings for securing inside a boat or on top of a luggage rack.

The PS490 bags are designed for extreme applications and are even used as haul sacs. All sizes 59 litres and above feature additional side handles. The model in black-lime has a valve for deflation and easier packing.

## DRY BAG PS10 WITH VALVE

No air left! If you can say this about your ORTLIEB compression dry bag, you will be happy about gaining further space inside your pack. By means of the valve mechanism air is expelled from the bag, reducing the packing volume to a minimum. The ultralight nylon fabric PS10 is waterproof - an ideal supplement for non waterproof baggage. The roll closure with a fabric stiffener bar is easy for one person to handle.

# DUFFLE RS

NEW

Winner of the OutDoor INDUSTRY AWARD 2014, the Duffel RS is made to withstand the rigors of the most adventurous of expeditions while at the same time offering a high degree of travel comfort. The bag's heavy-duty wheel system is connected to the body of the bag in a waterproof manner. The 90 mm wheels and the rigid floor plate made of contoured aluminum offer increased floor clearance – ideal for both airport terminals and rugged outdoor terrain. And given the importance of lightweight luggage, especially when travelling by plane, the bag's designers opted for an adjustable grip that guarantees plenty of leg clearance and comfortable towing instead of a heavy telescopic towing frame. The foam padding at the base of the bag offers enhanced stability when the bag is fully loaded and the watertight zipper that runs across the whole length of the bag gives you quick access to your gear. The zipper can also be locked using the integrated wire loop and a small cable lock (not included).

**Further features:**

The empty Duffel RS can be rolled and thus saves space when stored | Padded, removable shoulder straps you can use to carry the bag like a backpack | Compression strap | Zippered internal pocket | Mesh outside pocket (not watertight) | 2 daisy chains for attaching more gear

The Duffel is for adventurers searching the extreme and expecting excellent performance. The waterproof travel bag protects clothing etc. from water and dirt, and can quickly be converted into a backpack by using the padded handles as shoulder straps. A long TIZIP zip allows quick access to your gear. Internal straps compress the volume. The tough PS620C base fabric makes it an extremely durable expedition bag. The bag can be secured with a padlock (not included) through a wire loop at the zipper.

# RACK-PACK

This waterproof travel bag has all the advantages of an easy to use dry bag: its flexible and variable packing volume adjusts to any situation and takes all the gear for travelling and sports. The roll closure with stiffener bar has its roots in stuff sack technology. It fits perfectly into bike trailers and sizes S or M can be combined with ORTLIEB Back- and Front-Rollers Plus and Classic on the rack for bike touring. This robust multi-talent bag is also good on motorcycles. Comfortably carried with adjustable padded shoulder strap and carrying handles. Rack-Pack is available in four sizes.

**Further features:**

Roll closure with stiffener bar | Compression straps | Buckles for combining with bike panniers

## SEIZE THE MOMENT !

Experienced photographers know that pictures are stronger than words. ORTLIEB has designed a concept for functional transport systems, so that you are not going to miss one of those moments. ORTLIEB camera bags protect highly sensitive photographic equipment from humidity, dust and impacts, but allow in the decisive moment quick access to camera, lens, binocular etc.

So when looking for the best moment and the nicest motive you are well prepared. For many years professional photographers and scientists have entrusted their technology to ORTLIEB.

## DAY-SHOT

This flexible camera backpack is a favourite for professionals and amateurs alike. It is tough and reliable, and protects sensitive equipment from dust, rain and impacts. The PU coated nylon pack offers plenty of room for voluminous photographic equipment, additional food, gear and clothing. A waterproof internal compartment is proportioned to take a DSLR camera with zoom lens, two further lenses (wide angle to standard) and one small tele lens, flash unit and 10" laptop. The flap inner pockets hold accessories such as memory cards, rechargeable batteries, filters etc. There are numerous fixing options and gear loops for further equipment like a tripod.

The Day-Shot can be carried with two straps like a backpack (comfortable carrying system) or with only one strap (sling function) over your shoulder (the other strap can be stowed away in the pack). It may also be carried in the front, and offers the advantage of the camera being quickly accessible for a snapshot thanks to the waterproof TIZIP zipper. A quick lens change does not require the pack to be put down, and it also serves as stable support for the camera for blur-free pictures.

### Specifications:

volume	21L / 1281 cu.in.
feature	TIZIP
weight	2050 g / 72.3 oz.
inside dimension	50x31x20 cm / 19.7x12.2x7.9 in. (HxWxD)

## SOFT-SHOT

Photo: Wolfgang Ehn

The cool appearance of the waterproof Soft-Shot with buckled flap disguises its real purpose - at first sight it does not look like a camera bag. The bag is designed for a DSLR camera with zoom lens and up to three further lenses. Well protected but still quick to hand. Separate sleeve takes a tablet PC. The flap allows fast access to the main compartment. The internal dividers are individually adjustable and can be adapted to fit any personal camera gear. A padded removable shoulder strap is fixed with snap hooks.

### Specifications:

volume	9.7 L / 591 cu.in.

### Further features:

Waterproof zippered main compartment | Buckled flap with integrated mesh pockets (not waterproof) for accessories e.g. memory cards, rechargeable batteries, filters etc. | PU coated nylon fabric

## DIGI-SHOT

Digi-Shot M

Digi-Shot L

A miracle when it comes to space. The bag is designed for extensive camera equipment. Digi-Shot has a waterproof rigid main compartment and is available in two sizes. Size M offers room for larger SLR cameras with zoom lens and two further lenses (wide angle to standard). Size L is proportioned to take larger SLR cameras with zoom lens, a second body and three further lenses with a flash unit.

The main compartment (of both sizes) features a waterproof zipper and buckle sealed flap for quick camera access. Individually adjustable inner divisions are adaptable to equipment. Filters,

rechargeable batteries and other accessories fit into the flap with inner mesh pockets (not waterproof) or the outer mesh pockets with Velcro. Carrying handle and the comfort padded removable shoulder strap with snap hook for carrying heavy loads.

### Further features:

PU coated nylon fabric | Size M has belt loops and D-rings for fixing to carrying system for camera bags (optional accessory) | Size L has tripod attachment loops

## V-SHOT

Ideal allrounder for active outdoors people: V-Shot is a compact camera bag with waterproof zipper. Reliable in toughest weathers and climates it offers room for a DSLR camera with a 200 mm zoom lens, rechargeable batteries, memory card and further accessories. The V-shaped bag is flexible and versatile in use either as shoulder bag or prepared for hands-free carrying when fixed to the ORTLIEB camera carrying system (optional accessory for fixing to D-rings) which keeps your hands free for climbing or using poles.

### Further features:

## COMPACT-SHOT

NEW

Whether out on a desert expedition, hiking along a mountain trail or retreating to one of your favorite local greenways, the Compact Shot will reliably protect your compact or system camera against the rain and dust. The bag's waterproof, largemouth zipper always offers you quick access at the critical moment. The handle, the detachable shoulder strap and the waist strap on the back of the

bag ensure that you will have various ways of comfortably carrying your precious gear. The ORTLIEB camera carrying system, which can be purchased separately, will allow you to carry the Compact Shot snugly on your body, effectively leaving your hands free for other important tasks, like climbing, riding a bike or Nordic walking.

On and off road, the waterproof and dustproof Speedbags with side roll closure will accept any challenge. They are presented in the MOTO look, and there are hardly any other double panniers as modern and functional as the Speedbags. Their low design is perfect for enduro and touring bikes with high exhaust pipes.

The rigid self-supporting construction replaces the rack: the panniers can be easily fixed with the broad Velcro and straps to the passenger seat. The symmetrical cut offers plenty of storage space without compromise for the passenger. Comfortable carrying handles allow easy transport and handling.

# MOTO TANK BAG

**With magnetic attachment:**

One of the biker's basics: the waterproof MOTO Tankbag keeps all your necessities at hand that would be unavailable when carried on your back. A piece of luggage that guarantees pure driving pleasure. The adjustable base with anti-slip, tank-protecting surface is suited for almost all standard motorcycle tanks. The MOTO Tankbag is securely fixed with magnets and straps as well as an extra strap attachment around the frame. Alternative fixing as a tail bag is also possible. Easy to attach, fast to access and almost indestructible. The aerodynamic design with tyre tread motif and two-way access make it a faithful companion for touring. A transparent waterproof (22x26cm/8.7x10.2 in.) mapcase may be fixed on the Tankbag or directly on the base.

**Further features:**

Roll closure with carrying handle | Sturdy, waterproof zip | Extremely abrasion and tear-resistant fabric | 3M Scotchlite reflector

**Optional accessory:**

Carrying System for MOTO Tankbag

**Advice:**

We recommend using a protective fabric between tank and magnetic base. The magnets are very strong - please keep credit cards away.

## STAY IN THE SADDLE!

Imagine the wind in your face, the sun on your skin and only the sound of hoof beats. Enjoy it even more knowing that your gear is kept dry and safe, be it on short horse rides across farmland or multi-day horse treks through the bush.

ORTLIEB horse panniers are spacious, waterproof and comfortable for horse and rider.

## HORSE PANNIERS

Enjoy nature, get away from your daily routine and form a team with your four-legged partner: horse back riding is an effective way to escape and slow down. However, you will reach relaxation and your day's destiny only if both - rider and horse – enjoy what they do. This constitutes the development background of our horse panniers. They are designed for perfect packing with compression of volume and tight packing to keep things stable. A rear pad prevents unpleasant chafing. The welded waterproof panniers offer reliable protection from water and dirt, and feature a lid with snow gasket and draw cord. In favour of your horse please watch out for equal weight distribution. It is advisable to use an extra pad or blanket underneath the pack. The horse panniers feature a tough tear and abrasion resistant fabric that are easy to clean and can be mounted to distance, trekking, military, western and all-round saddles.

fabric	polyamid
colour/art.no.	black / N30

The Shower Valve can be put onto all ORTLIEB water containers. Remove the dust cap, put on the shower valve, and open the tap. The contents of the Water Sack are enough for a pleasant shower. Can also be used as a garden shower or watering can.

### Further features:

Small holes for constant showering | Quick opening and closing of valve

## WATER BAG

PVC free BPA free

The lightweight alternative to plastic or aluminium bottles. The compact Water Bag features straps for fixing to the backpack, and is made of tear-resistant and watertight fabric. Food grade coating on the inside ensures safe transport of your water. The 4 and 10 liter versions can be easily fixed to branches or vehicles thanks to the two handles being provided with buckles.

### Applications:

Camping shower | Seat or head pillow | Weight for paragliding | Buoyancy means for diving | Can be combined with outdoor filters for water purification | Can be combined with the drinking tube for use as a hydration system

### Advice:

All water containers are suited for water only (max. temperature 60°C/140°F). Do not use for alcoholic, sweet or acid liquids. Do not expose drinking water too long to the heat. Change water regularly. Store dry and open. Clean inside with denture cleaning tablets. Clean outside with warm water, brush and neutral soap. Clean the valve regularly.

## DIFFERENT TYPES OF WATERPROOFNESS

All materials used and all welding seams are waterproof up to a water column of 100,000 mm. However, the degree of waterproofness and dustproofness of a specific product always depends on the type of closure. It is important that the product is properly and completely closed. This refers in particular to:

### Roll Closures:

they must be rolled 3 to 4 times (e.g. Back-Roller), and 5 to 6 times on ultra light dry bags.

### Velcro Closures:

must be folded 2 times along the entire width (e.g. Safe-it).

### Sealing Closures and Zippers:

must be closed all the way, e.g. camera bag Protect and Big-Zip.

### Lid Closure:

(and snow gaskets with cord underneath): must be properly closed and fixed with buckles, e.g. Bike-Packer.

### IP Standards:

All types of closures used on ORTLIEB products were submitted to simulation tests by LGA QualiTest GmbH, TÜV Rheinland Group, Nuremberg, Germany.\*) These protection standards which have their origins in electronic technologies are referred to as IP, international protection standards, and are increasingly used in the field of leisure activities. Currently, this is the only valid and acknowledged international classification regarding waterproofness and dustproofness. The degree of protection is defined by two figures. Altogether there are 6 protection standards for solid bodies, and 8 protection standards for water.

### Protection against dust:

The first figure defines the protection degree of a product against the penetration of solids and contact. 5 and 6 refer to the protection of dust and contact (e.g. by hand).

### Protection against water:

The second figure defines the protection degree against water. 7 e.g. stands for the protection against water penetration at a defined water depth during a determined period of time.

**Example:** IP64, ORTLIEB Back-Roller; this product is dustproof and is protected against splashwater from all directions.

ORTLIEB products are classified according to the following protection standards depending on the type of closure used on the product:

**IP5\_:** product is protected against dust, slight penetration of dust possible

**IP6\_:** product is dust proof, no penetration of dust

**IP\_3:** protected against spray water (max. 60° to the vertical)

**IP\_4:** protected against splash water coming from all directions

**IP\_7:** protected against penetration of water during temporary immersion; depth: 1 meter/39 inch (lower edge of product); duration 30 minutes

\* IP international protection standard examination according to DIN EN 60529:2000

### Manufactured according to ORTLIEB standards:

Our coated fabrics are not standard fabrics but are particularly developed for a specific field of application, and are manufactured according to our company quality requirements.

### Folding-resistant up to 100,000 folds:

We have very high quality expectations concerning the folding resistance of a fabric, because numerous products are provided with the „roll closure“.

### Quality Control:

All important material characteristics are continuously controlled at goods received. The mounting components of bike panniers are subjected to extreme riding simulation tests.

### Azo-free dyes:

Although ORTLIEB products are not subject to the AZO ordinance, we only use AZO-free dyes.
